WALNUT SERIES

协进装饰
XIE JIN DECORATION

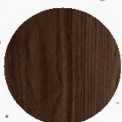

Walnut is mainly divided into red walnut and black walnut.

Red Walnut is mainly cultivated in Central and West Africa. It is a megaphanerophyte with 1-2 meter diameter. Its sapwood is light grey and its heartwood is pink brown to light red with lustre.

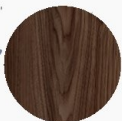

Black Walnut is mainly cultivated in East America. Its sapwood is milk white and its heartwood is light brown to dark chocolate. Black Walnut is very precious and expensive, therefore, only its veneer will be used for furniture instead of wood itself.

ELM SERIES

协进装饰
XIE JIN DECORATION

Elm is widely cultivated in West China as it can survive cold and dry weather.

Elm is famous for its texture which is irregular and like a Chinese ancient landscape painting. The texture is like the recording of the whole life experiences of that elm.

Elm

Origin

Deciduous macrophanerophytes, and the tree is high. Elms spread all in North China, especially in Yellow River area.

Sapwood and heartwood

Sapwood is dark yellow and the heartwood is dark purplish gray.

Texture

The texture is clean and smooth. The bastard grain is beautiful and it is near to the grain of 'chicken-wing wood'.

Characteristics

The texture of elm is like overlapping mountains or lakes with layers of ripples.
